ABOUT

- Versatile engineer specializing in the modernization of legacy architectures through high-performance, end-to-end solutions; combining a rapid ability to adopt new technologies with deep expertise in building scalable APIs and scalable software.
- Strong communicator and collaborative team member committed to bridging the gap between technical requirements and business goals to deliver high-impact results.

TECHNICAL SKILLS

Programming: Python, Java, TypeScript, HTML, CSS

Frameworks & Architecture: React, Angular, WPF, Tailwind

Technologies & Tools: SQL, PostgreSQL, GitHub, gRPC, OpenAI API, AWS.

EDUCATION

THE AMERICAN COLLEGE, Madurai, B Sc in Computer Science

Aug 2022 – May 2025

- GPA: 7.6/10.0
- Coursework: Data Structures and Algorithms, Operating Systems, OOP Concepts, Computer Network, ML/Cloud

WORK EXPERIENCE

SOFTWARE ENGINEER, iAutomatia – Bangalore, KA

June 2025 – Present

- Engineered a **Python Application** to synchronize robotic systems with industrial hardware, including an automatic industrial dispensing systems.
- Developed a high-performance **gRPC API** to enable real-time, bidirectional communication between the WPF front-end and backend controllers for industrial machine.
- Developed the front-end interface for a **medical device using QML and JavaScript**, ensuring a high-performance, responsive UI for critical healthcare workflows.
- Conducted **end-to-end unit testing** and validation for the medical device software, ensuring 100% compliance with functional requirements and system stability.

WEB DEVELOPER - FREELANCE, Thiyagam Trust – Madurai, TN

Mar 2025 – [Link to Repo](#)

- Redesigned the organization's website using **React**, **Next.js**, and **TypeScript** to modernize structure and performance.
- Integrated **Sanity.io** as a headless CMS, enabling dynamic content management and providing an admin interface for **seamless uploading of media**, reducing dependency on source-code changes.

PROJECTS

Personal-Site

[github/personal-site](#)

- Built a fully **responsive personal portfolio** showcasing projects, skills with clean modern UI using React Bits components.
- Developing a RAG-inspired (Retrieval-Augmented Generation) chatbot using Python and OpenAI APIs to serve as an interactive resume, streamlining how recruiters access key information.
- Deployed on **Vercel** with **CI/CD** for instant updates and global edge caching.

Investment Portfolio Monitor

[github/portfolio-tracker](#)

- Built a Python-based portfolio tracker that fetches ETF and mutual-fund NAVs from yfinance and updates GSheets for portfolio monitoring.
- Calculated cost basis and total portfolio performance using purchase amount and date, and **automated** with a **.bat** file.

CERTIFICATES

AWS - Cloud Practitioner Essentials

[Link](#)

- Gained foundational knowledge of core AWS services – **EC2**, **S3**, **Lambda**, **RDS**, **IAM**, security, regions.
- Studied the **AWS Shared Responsibility Model** and cost management tools to optimize cloud resource utilization and security.

Meta Front-end Developer

[Link](#)

- Mastered **React.js**, **JavaScript**, and **CSS** to build responsive, accessible user interfaces while implementing **Figma** designs and managing version control with Git.
